

## PRO-TEAM PRODUCTS & BENCHMARK ANNOUNCE RELEASE OF MEDUSA SLING TRIGGER

### MEDUSA – IT WILL MAKE YOU ROCK

Pro-Team Products and Benchmark do it again with the introduction of their Medusa Sling Blade trigger frame – THE high performance 45 double trigger frame for Autocockers AND Automags.

That's right! Not only does the Medusa frame take trigger technology a whole giant leap forward, it also reduces inventory expenses for retailers across the board, since they only need to stock one frame, along with sear assembly packages!

Once again for those who might not be seeing the big picture: The MEDUSA Sling Trigger system uses the SAME FRAME for either Automag or Autococker bodies – all you have to do is swap sear assemblies.

If that technological feat isn't enough to satisfy, try this on for *size*: Pro-Team Techs have reduced the active trigger pull on an Autococker to 1 millimeter of travel for the 3-way rod. That's .03937 inches for those of us in England and the US, or just a teensy bit more than a 32<sup>nd</sup> of an inch.

And as they say on the infomercials – AAAAAAND THAT'S NOT AAAAAALLLLL!

You get Pro-Team Product's patent pending ADJUSTABLE magnetic trigger return system, THREE different means for adjusting the trigger (forward travel, rearward travel and sear actuation), stylish milling and much much more!

A Pro-Team Products installation manual! 1 Year Factory Warranty! Satin Black, Ultra Black or Nickel finish!

And for a limited time only – if you order right now – a complete set of Ginzu knives. (We're only kidding about the Ginzus – everything else you get.)

On the more serious side. The Medusa Trigger frame uses a magnetically loaded trigger for fast rates of return, a long, meaty trigger that you can personalize and great styling. The magnet's strength is fully adjustable and gives the sling trigger a really snappy return that can be customized to the user's taste.

The ability to adjust the strength and angle of the trigger action, as well as adjust sear height without disassembly of the marker makes this a particular must for autococker lovers. Standard 45 frame design means you can still hang on to those custom grips and won't have to change your grip.

Retailers will love the ability to stock a single frame for two guns: its like have one barrel that will thread into all guns!

As always – Pro-Team Products & Benchmark gear carry a one year customer satisfaction warranty, proven workmanship and Four Star Quality.

Dealer inquiries welcome. Patent Pending technology. Medusa & It Will Make You Rock! are Trademarks of Pro-Team Products.
